## Education

---

### IPN ESIME Culhuacan

Computer Engineering

*January 2022 - October 2023*

### UVM

Software and Network Design Engineering

*December 2023 - Present*

## Experience

---

### Viveplus | Ike Asistencia

Backend Developer

*December 2023 - Present*

- I designed and implemented an API for personalized offer searches, enhancing user's ability to find relevant promotions.
- I developed a cashback tracker that allows users to view their rewards and the status of their transactions.
- I automated processes for handling transactions with VISA, including instant notifications to users via SMS and email.
- I created a secure administrative panel for managing offers, leveraging AWS Cognito for authentication.
- I integrated Stripe to manage one-time payments and recurring subscriptions, ensuring a seamless and secure payment experience.
- I developed an email automation system, optimizing user communication at strategic intervals.
- I updated an existing application to its latest version, ensuring system compatibility and security without service disruption.
